PREFACE.

MOUNT PLEASANT,
ROXBURY, Mass., Oct. 10, 1878.

Mr. Holland's Medallic Collection is so well known to American numismatists that it hardly requires an introduction; but I may be excused for calling the attention of those who have not seen it to a few of its peculiarities.

A glance at the catalogue will show its great extent, comprising as it does considerably more than two thousand specimens; but a *glance*, except to the close observer, might fail to reveal one most important fact, namely that there are in the collection *no duplicates in metals;* so that each number represents a distinct pair of dies. Mr. Holland's preference seems to have been for medals in silver, of which there is an unprecedented number, but he never thought it worth while to retain even two medals in different metals.

While silver predominates wherever a choice of metals was possible, gold is not unrepresented, as will be seen by reference to the fine examples catalogued in Nos. 468, 469, 1345, 1368, 2937, and elsewhere.

In a collection of this magnitude it is not to be supposed that everything is rare, or even remarkable. Mr. Holland, with the spirit that always animates the true collector, sought to make his collection *complete*, not only in rarities, but also in those things which are common and hence little prized. And here may be remarked, what no col-

lector of experience has failed to observe, that many things easily procured at the time of their issue, perhaps but a few years ago, now rank not only as rarities but as treasures.

Notable among these are the small works of Wright and Bale, the Counterfeit Half Cent of 1796, and many more that will be recollected by the skilled numismatist.

Where the number is so great it is quite impossible to call attention to all specimens remarkable either on account of their rarity, or their beauty, but happily any suggestion on these points would be superfluous if addressed to those for whom this catalogue is intended.

Some departments which in American Collections are usually but feebly represented it will be noticed are in this, uncommonly full. As examples may be named Corps Badges, the collection of which is wonderfully complete; Coins and Medals of the British Dominion in North America also well represented; and the collection of Isle of Man Currency here presented, is probably second to but one in existence, and it happens that that one is in this country.

In every department samples will be found well worthy a place in any cabinet, and it is believed that no cabinet in the land is so complete that it cannot be improved by a judicious selection from this.

While giving to Mr. Holland due credit for learning, taste and liberality, as shown in the perfection of his collection, we must not neglect to accord to Mr. Seth H. Chadbourne due praise for the patience and skill shown by him in a more humble department of numismatic

science. To him is due the great extent and comparative perfection of the collection of Store Cards here catalogued.

In the early series of American Cards, few pieces are wanting, and some are found here which if not strictly unique, are at least hard to find elsewhere. In the currency of 1861–63, a greater variety is offered than has ever before appeared in a public sale. In the minor department of Sutler's Checks it is believed that this collection surpasses all others. An examination of No. 3217, an accurate manuscript and printed descriptive catalogue of Mr. Chadbourne's collection, prepared by him, will convince any one that his efforts are not over rated.

The comparative absence of the Regular Mint Series will no doubt be regretted by collectors, as it is deplored by the owner; but it must be remembered that Mr. Holland's specialty was Medals, to which he consistently adhered.

The few pieces of the Regular Series found in the catalogue, it will be seen, are by no means destitute of interest; the Washington Pieces and the Early American Coins are specially worthy of attention; the former for their rarity, fine condition and great number, and the latter for their select character.

It is hoped that something of interest may be found for every collector, in the modest lines of Autographs and Numismatic Literature here described.

When first announced it was intended that this sale should include several hundred Washington Portraits, as well as a very extensive and choice selection of

Sermons, Eulogies and Orations pronounced on the occasion of Washington's death, and published in 1800; also a collection of Bric-a-Brac.

As the preparation of the catalogue advanced, it was found impracticable to include the memorials of Washington, and bring the sale within the compass of a week as at first intended; so they were reluctantly dropped, but even with that omission of some five hundred numbers, when the manuscript was finished it was found to comprise more than 4500 lots, thus compelling another excision; and at one clip the Bric-a-Brac, with all the relics of the Mound Builders, the Implements of the Stone Age, Indian Dresses, Idols, Guns, Swords and Pistols, New England Relics, Porcelain and Pottery, fell in a heap; but they have all been gathered up, a separate catalogue has been made, and a sale has been arranged for, and will be announced in due time.

A word as to my share in all this matter, and I am done. It is not without great satisfaction, and some small degree of pride, that I call to mind the fact that my catalogues are not wholly unknown to American collectors; and regarding the descriptions of the articles here offered for sale, I have only to say that as heretofore, I have endeavored to give as far as possible of each lot a fair account, no more, no less. That I have fallen into errors is quite probable; but I trust that my experience in the work, joined with my good intentions, has kept me from mistakes that could possibly mislead or injure any buyer.

No other having appeared since this was first sold, it is, with scarcely a doubt, unique, and I regard it as not only the rarest, but the most valuable of all known Washington Pieces, excepting alone the Washington Half Dollar from the Finotti collection. The metal of which they are formed I believe is

almost uniformly brass, some being gilt and some silvered. This general statement is made to save particular description.

Few works of fiction equal in romantic incidents, the true story of the life of Lady Frankland. A bare footed girl in a Marblehead inn; educated by Sir Henry; lived as his mistress for many years; rejected by society in Boston, and by his family in England; rescued her husband from death, when engulfed by the great earthquake at Lisbon; married to Sir Henry, both by Protestant and Catholic forms; received with honor by his family in England; returned to America; on the breaking out of the Revolution was banished; returned again to England, a refugee, and still a patriot; surviving her husband, married again, and died at Chichester. Her letters are almost unknown. This, which treats of family affairs in Boston and in England, was addressed to her friend, Mrs. Gilbert Deblois.
